Compact Sealing Machine

Features

Flexible Caliber Sizes
Optional charging kit to change caliber sizes.

Product Capacity
100 pcs/min.

Compact Layout
Maximum station size of 2000mm x 1000mm, height 1780mm.

Integrated Process Check
Precision dispensing valves and UV curing light with camera detection.

Remote Control
PLC + MicroTik support service.

Technical Specification

Central PLC Control
Siemens S7 and control panel.

Remote Diagnostics
Internet connection required for remote diagnostic management.

Safety Features
Electronic locks, password protection and safety devices compliant with EU standards.

High-Quality Parts
Siemens, Festo, Keyence, and more for reliability and efficiency.

Dynamic Sealing Machine with Dual Sealing Lines

Features

Flexible Caliber Sizes
Optional charging kit to change caliber sizes.

Product Capacity
250 pcs/min, with each line capable of 125 pcs/min.

Dual Lines for Flexibility
Can handle the same or 2 different calibers in one machine.
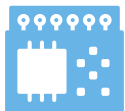

Integrated Process Check
Precision dispensing valves and UV curing light with camera detection.

Remote Control
PLC + MicroTik support service.

Technical Specification

Central PLC Control
Siemens S7 and control panel.

Remote Diagnostics
Internet connection required for remote diagnostic management.

Safety Features
Electronic locks, password protection and safety devices compliant with EU standards.

High-Quality Parts
Siemens, Festo, Keyence, and more for reliability and efficiency.
